

ITALDRAGHE

PROPULSION UNITS

ITALDRAGHE SPA, in the maritime industry since 1952, offers a series of **rudder propellers** compatible with multiple categories of vessels.

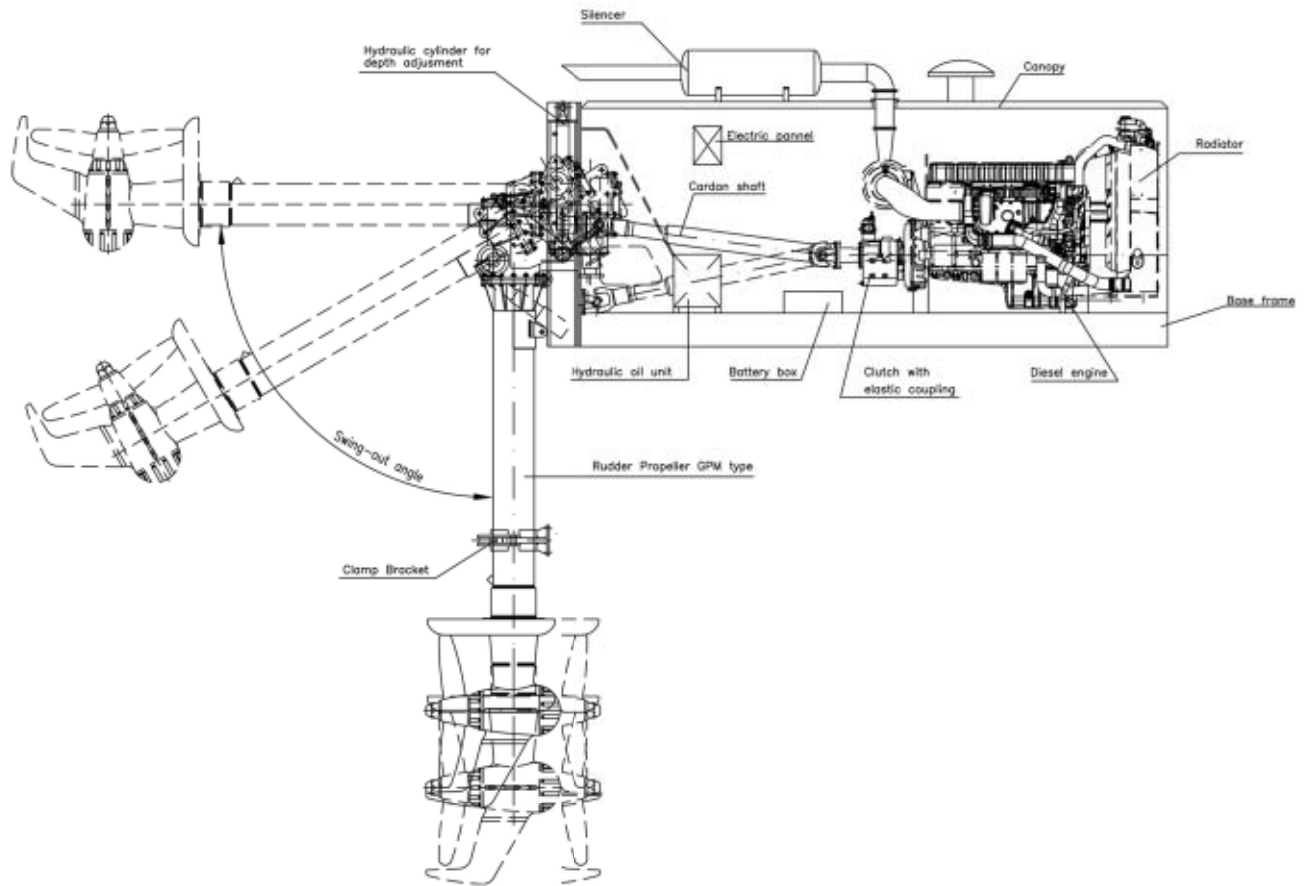

Easy to install, they are the solution for whom is interested in commuting into motorized a normal floating body: **adjustable** and **simple to use**, ITALDRAGHE propulsion units allow for correct immersion during navigation according to vessel load and water depth.

Efficient manoeuvring and positioning are possible thanks to their 360° azimuthal rotation.

Smart and **reliable**, they are available in several models and in the **best Italian design**: their hydraulic jacks **grant effortless routine inspection** and **maintenance** by raising the units body out of the water.
